Personal data processing policy for the Markiro website and licensing

Purposes, retention, recipients, and rights of Markiro website visitors and applicants. The Russian text is authoritative; this English text is an informational translation.

Revision details

Field	Value
Document code	MKR-PD-01
Revision and date	2026.10/01 · 30 October 2026
Website	https://markiro.app
Entrepreneur	Индивидуальный предприниматель Богатырев Владислав Сергеевич

1. Scope and controller

The Controller is individual entrepreneur Богатырев Владислав Сергеевич, INN 234106228141, OGRNIP 326237500395950, address: 353745, Краснодарский край, Ленинградский район, ст. Ленинградская, ул. Грузская, д. 26. Inquiries are accepted at hello@markiro.app, the alternative address hello@v-b.tech, and the Controller’s postal address. This policy covers markiro.app, requests for an installer, demonstration, invoice, or license, contractual correspondence, support, and voluntary advertising subscriptions.

The Controller processes data lawfully and for predetermined purposes, limits their amount and retention, and ensures accuracy and protection. Data in a customer’s production database do not become website data merely because the customer has purchased a license.

2. Purposes and legal bases

Purpose	Data	Basis and retention
Installer, demonstration, invoice, and license request	Email, company, individual entrepreneur’s INN, provided contact details, selected plan, and inquiry content	Separate consent MKR-PD-02; until the purpose is achieved or consent is withdrawn, and no longer than one year after the applicant’s last substantive contact.
Concluding and performing a contract, licensing, and support	Details of individual entrepreneurs and representatives, business correspondence, payments, site, host and license-file identifiers, versions, and technical information in the inquiry	A contract with the data subject where they are a party or beneficiary; for a representative, appropriate consent or a demonstrable lawful basis under Article 6 of Federal Law No. 152-FZ; compliance with law and protection of rights.
Mandatory records and resolution of claims	Contract, invoice, receipt, acceptance documents, payments, and necessary evidence	Statutory retention periods; for a dispute, the necessary extent until proceedings and enforcement of the decision are complete.
Voluntary email advertising	Email, address confirmation, two separate consents, delivery and unsubscribe status	MKR-ADV-01 and MKR-PD-03; until withdrawal, but no longer than two years after address confirmation.

Purpose	Data	Basis and retention
Security and recording choices	Limited logs, IP address or its protective identifier, time, technical errors, consent revision, and request identifier	Protection of legitimate interests without infringing the data subject's rights and compliance with security duties; only the necessary extent and period.

The Controller bears the burden of establishing a lawful basis. A contractual relationship with an organization does not give a general right to process any data about its employees.

3. Sources and data minimization

Data are received from the applicant, an authorized representative, correspondence, and technical website events. Official public registers may be used to verify details to the extent needed to conclude a contract. Passports, dates of birth, employees' home details, special categories of data, and biometric data are not requested by default.

Applicants should not send passwords, PINs, tokens, electronic signature keys, live marking codes, or their complete production database. The activation request file is used to bind the license; diagnostic attachments are transmitted only through an explicit user action and in the necessary scope. Requesting a license does not authorize hidden, regular transmission of statistics.

4. Processing methods and recipients

The Controller performs collection, recording, organization, accumulation, storage, correction, retrieval, use, necessary transmission, restriction, erasure, and destruction by automated and non-automated means. Access is limited to persons who need it for the relevant purpose and are subject to confidentiality duties.

Providers of Russian server infrastructure, backup storage, and email delivery may be engaged under contracts. Transmission is limited to the provider's function; processing instructions specify the data, operations, purposes, confidentiality, safeguards, evidence of performance, and incident reporting. On request, the Controller provides the name, address, and role of the processor actually engaged, under Article 14 of Federal Law No. 152-FZ.

Authorized public authorities receive data where a lawful demand exists. The Controller does not sell data or transmit them for independent third-party advertising. A service notification to an external messenger must not contain an individual's name, INN, contact details, free-form request text, or a link disclosing such data.

5. Localization and external services

When personal data of Russian citizens are collected online, primary recording, organization, accumulation, storage, correction, and retrieval use databases in the Russian Federation where required by law. Contractual storage of website and request data is arranged in the Russian Federation.

The request and advertising subscription consents do not authorize cross-border transfers. Before enabling transmission to a foreign recipient, the Controller establishes a separate lawful basis, obtains the necessary information about the recipient, meets Article 12 of Federal Law No. 152-FZ, including notification of the competent authority, and informs data subjects. A messenger link does not require its use: email and postal contact remain available.

A customer's independent inquiry through an external service of their choice is also governed by that service's rules. It does not authorize the Controller to send other applicants' data or a production database to that service.

6. Cookies and visit information

The website may use necessary storage for choice preferences, form protection, and the state of the current action. It is not used for advertising. Requests may record the internal address of the submitting page, the time, and an identifier needed to handle the inquiry.

Optional analytics, storage of UTM advertising parameters and external referral sources, and advertising tracking are permitted only after a separate choice in cookie settings disclosing the purposes, data, provider, and retention period. Refusal does not prevent a license request. Consent to processing a request and advertising consent do not replace this choice.

The website must not load optional tools before the user makes a choice. Settings can be changed and consent withdrawn; collection stops after refusal. If a separate analytics service is not enabled, its information and consent must not be presented as active.

7. Retention, deletion, and backups

A request that has not resulted in a contract is retained until its purpose is achieved or for no longer than one year after the applicant’s last substantive contact. A closed request with no other purpose or basis is deleted or anonymized within thirty days. Automated emails and internal status changes do not restart this period.

Advertising processing stops immediately after refusal, and the contact is removed from active mailing. Evidence of consent and withdrawal is stored separately only to the necessary extent and with a separate lawful basis. Contractual and accounting documents are retained for the periods required by applicable rules; this basis does not justify excessive correspondence retention.

Once the purpose is achieved or consent is withdrawn, and no other basis exists, data are destroyed within the periods in Article 21 of Federal Law No. 152-FZ. If immediate destruction is technically impossible, the data are blocked and destroyed within the statutory maximum period. Backups must not return deleted data to normal processing; deletion markers are reapplied after restoration.

8. Rights and inquiries

The data subject may obtain information about processing and its grounds, require correction, restriction, or destruction of unlawfully processed data, withdraw consent, refuse direct advertising, and complain to Roskomnadzor or a court. Requests may be sent to hello@markiro.app, hello@v-b.tech, or by post to the Controller’s address.

The Controller verifies the applicant’s authority proportionately to the risk and does not require excessive information. A data inquiry is answered within the statutory period, generally ten working days, with a reasoned extension of no more than five working days where permitted. Stopping advertising does not require a separate lengthy procedure.

9. Data protection and policy changes

The Controller applies the necessary legal, organizational, and technical measures: access restrictions, secure channels, operation and retention controls, backups, and response procedures. In an incident, statutory duties are performed, including notification of the competent authority within 24 and 72 hours where applicable.

In a local installation, the customer independently determines the purposes for processing employee, user, and counterparty data and is their controller. The Licensor obtains access to these data only under separate documented processing instructions under Article 6(3) of Federal Law No. 152-FZ. Neither a website visitor’s consent nor a representative’s request consent replaces the lawful bases for processing customer employees’ data.

This policy applies from actual publication. Previous revisions are retained. New processing purposes require an independent lawful basis and notice; a new revision does not apply retroactively.
